

BIG OIL PROFITS. WE PAY.

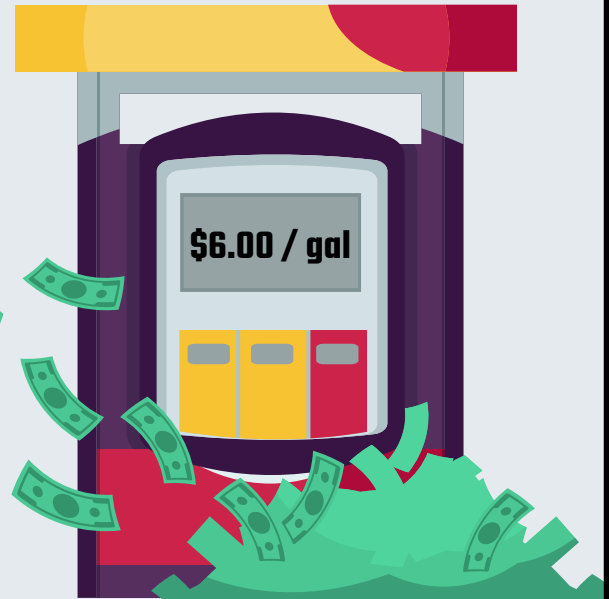

THEY DOLE OUT MILLIONS

Big Oil spent almost **\$77.5 million** over the last four years to defeat climate and public health policies in California and keep us hooked on a fossil fueled future.

THEY PROFIT BILLIONS

Oil and gas companies in the U.S. stand to collect a windfall of **\$126 billion** in wartime profits this year while Californians are forced to endure record costs at the pump.

WE PAY TRILLIONS

Californians pay the real price with our health and future: According to a **new report**, fossil fuel-driven wildfires, drought, climate chaos, pollution and other public health harms in California could total as much as **\$10 trillion** by 2045.¹

**POLLUTERS WANT MORE PERMITS, PROFITS AND POWER.
IT'S TIME OUR LEADERS REIN IN THIS GREED AND
PROTECT CALIFORNIANS.**
